# Portal to Dashboard

In this Section we are describing how you can gain Access to the Dashboard

1. First you need to create an account for the Catena-X Environment
2. Your Company needs to setup everything for the Connection with our Application: This can be found with the BPDM 'Create a Gate'
   And needs to be subscribed to the service

Country Risk Dashboard

price unknown

Use Case: Business Partner Management

Verfügbare App Sprachen: en

Angefragt

The value added service solution Country Risk Score gives different users additional information regarding their business partners. This is part of the Know Your Business Partner approach and enables the user to make better decisions based on aggregated information. The main part of the country risk dashboard are information per country regarding corruption, political stability, economic risk and social and structural figures. There are official sources connected like CPI or Basel but the service offers the possibility to upload company/user specific ratings.
