Upload Rating   **Download Template**

This Component includes multiple smaller Functionalities

- **Year Selection**
- **Gate Selection**
- **Show More Ratings**
- **Upload Rating**
- **Download Template**
- **Weighting of Ratings**
- **Deletion of Ratings**

The first step you need to take is to select a year.
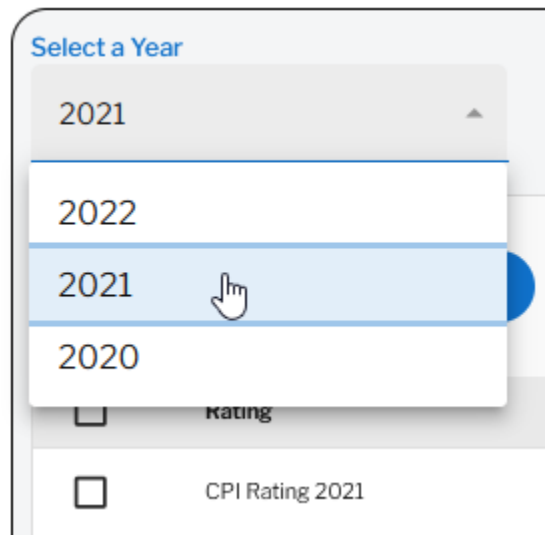

After you selected a year the Rating List will be updated. The Ratings in the List are saved for the selected year.
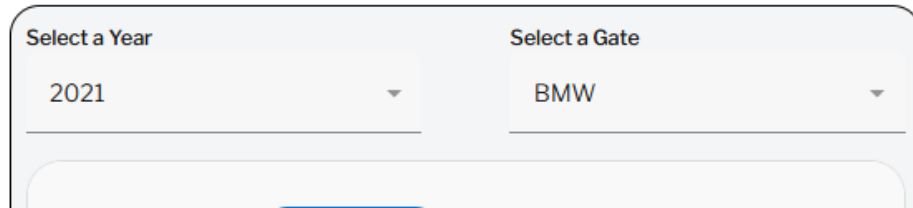

Currently all Globally available Ratings are Open Source. We do not create Scores, we only collect them and aggregate them according to your selections.
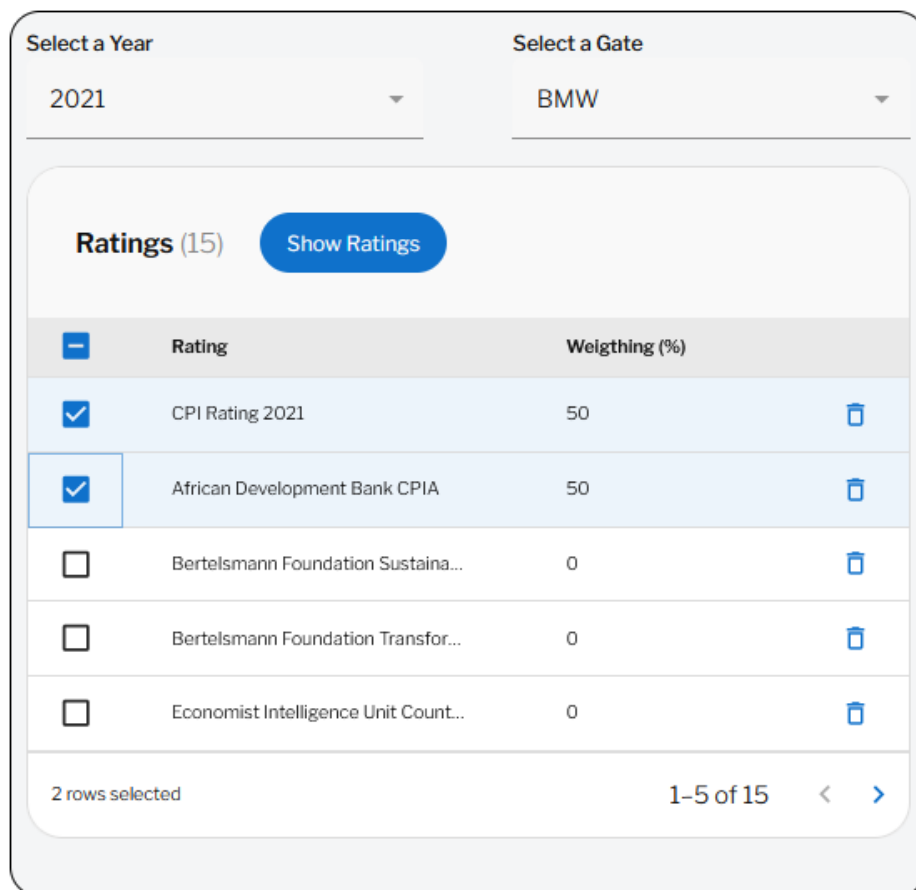

Next to the Year Selection you will find the the Gate selection. This selection will be done for you atuomatically on the first start-up of the Dashbaord.

The Gate gives the Input on which Business Partners you will be able see in all components.

Thereafter you can select one or multiple Ratings in the Table.

If you want to select more Ratings at once you can Opena Pop-Up with the 'Show Ratings' Button

In this Table you can manipulate the same way oyu can in the smaller Table.

After selecting a Rating the World Map will change the Color of each individual Country.

How is this done. Each Rating has a score for most of the Countries. We have a Score Range of 0-100 for each Rating

For Example the CPI Rating has a Score of 45 for China and 29 for Russia.

Depending on your selection with the Ranges the Country is then colored.

World Map
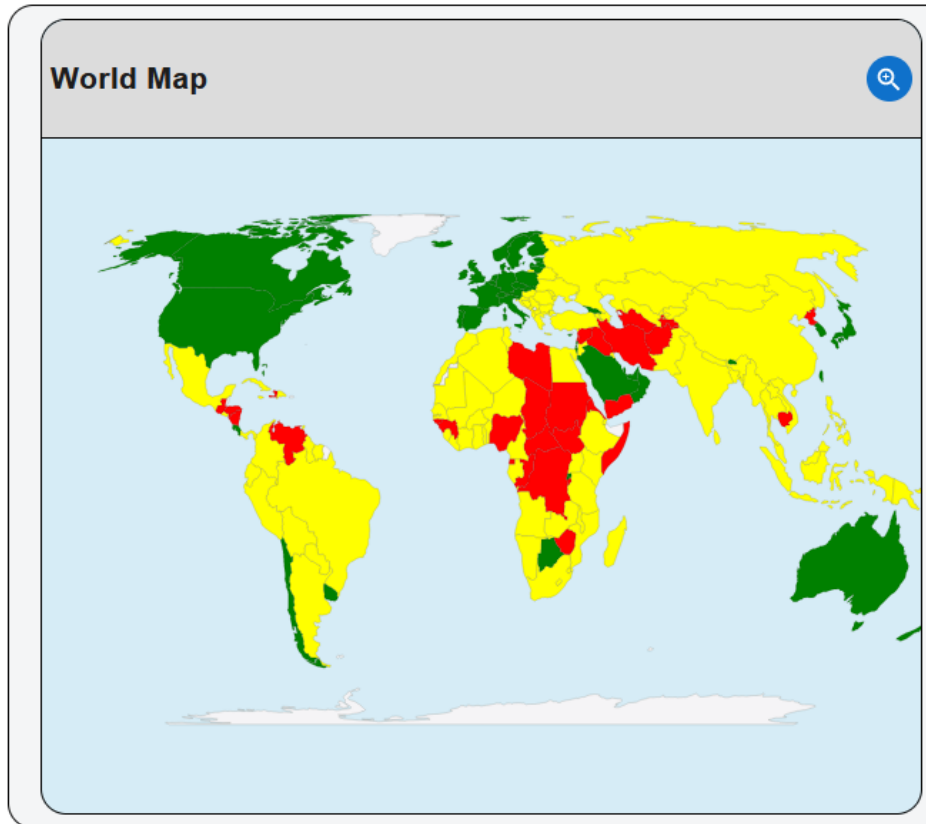

As you can see the Weighting column to the right of the Names are automatically created and evenly distributed.

This weighting can be customized individually.

The Rules for the weighting are:

- always needs to add up to 100%

2 rows selected   1–5 of 15   <   >

⊙ Total weight must be 100

- automatic weighting overwrites upon selecting new Raings
- when changing you need to confiem value by pressing "enter"

Changing the Weighting changes the Scores given in the Table below. How the Scores are calculated is this desbrided there.

**How can i Upload my own Rating and what do i need to know.**

The First step is to Download the Template. This is important since this is the Only Format the Application can progress the Upload.
